Krushna Palekar

Krush2711 | Krushna Palekar | krushnapalekar.py@gmail.com | +91 8329161401

Summary

IT engineering student with hands-on expertise in Python, data science, and applied machine learning including NLP, Computer Vision, and Deep Learning. Experienced in building and deploying full-stack ML applications. Currently interning at Kanini Software Solutions, developing AI-powered features using LLMs and the Gemini API.

Skills

Languages	Python, JavaScript, C++, SQL
Data Science & AI	Pandas, NumPy, Scikit-learn, Tensorflow, NLP, CV, Deep Learning, Matplotlib, Seaborn, Selenium (Web Scraping), Whisper, FFmpeg, Gemini API, RAG Pipelines
Frameworks & Web Technologies	React, Node.js, Flask, HTML, CSS, Tailwind
Tools & Platforms	Git/GitHub, Jupyter Notebook
Relevant Coursework	Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Experience

Product Development Intern | Kanini Software Solutions, Pune (On-site) June 2026 – Present

- Working on full-stack web features using React, .NET, SQL, and REST APIs; developed responsive UIs and optimized SQL queries.
- Making an AI-powered Study Tracker using Gemini API and NLP to generate lecture summaries, flashcards, and personalized revision schedules.
- Collaborated with senior developers via Agile practices including code reviews and testing.

Projects

RAG-Based Video Question Answering System Repository

Built a RAG-based video Q&A system that extracts, embeds, and retrieves key content from long videos. Implemented Whisper + FFmpeg for transcript generation and cosine-similarity retrieval for accurate context matching. Integrated Gemini to deliver precise, grounded answers from video segments.

Let's Get Pack (AI-Powered Travel Assistant) Repository + Preview

Developed a full-stack travel planning platform using React and Flask. The system generates personalized itineraries from destination, budget, and trip duration using structured JSON data and dynamic day-wise planning. Added automatic location extraction, activity suggestions, cost estimation, and image support, delivering a smooth and interactive user experience.

Gurgaon real estate price prediction Repository | Preview

Built a Gurgaon real estate price prediction web app by scraping property listings, performing end-to-end EDA, outlier treatment, and feature engineering, then training and deploying a regression pipeline via Streamlit.

Certifications

- **Machine Learning Specialization :** DeepLearning.AI & Stanford University (Andrew Ng)
  Courses: Supervised ML, Advanced Learning Algorithms, Unsupervised Learning & RL Certificate
- **The Ultimate Job-Ready Data Science Course :** CodeWithHarry View Certificate
- **Kaggle Python Certification :** Kaggle View Certificate

Education

B.E. Information Technology *2023 – 2027*
Trinity Academy of Engineering, Pune *CGPA: 8.51 / 10*
